

# Liberty's Sex Offender Management and Monitoring Programs - Reducing Recidivism and Keeping Your Communities Safe

## IDOC's INSOMM Program Earns "PROGRAM OF THE YEAR"

Our statewide program in Indiana has helped to protect the public by maintaining one of the lowest rates of recidivism in the country for well over a decade. In fact, the Indiana Department of Correction (IDOC) SOMM program was awarded the 2014 "Program of the Year" by the Indiana Criminal Justice Association. As can be noted in our graph to the right, only 1.29% of INSOMM sex offenders released to parole in 2010 committed a new sex crime within 3 years of release.

"In its operation and management of the INSOMM program, Liberty has proven to be an invaluable partner with the IDOC in its mission to enhance public safety by reducing recidivism in convicted adult and adjudicated juvenile sex offenders. We are extremely proud of the achievements we have made together over the past 16 years, and believe the program outcomes are among the best in the nation."

**A CORRECTIONAL CHALLENGE:** The manner in which sex offender risk is determined and how sex offenders are treated, released into the community, and monitored is a significant concern for public servants and community leaders.

Despite this heightened concern, many corrections departments may have limited budgets or staffing resources to properly address the unique issues surrounding sex offenders. **While corrections officials' search for effective and efficient solutions, offender recidivism, returns to prison for failure to register, and violations of parole continue to drain important departmental resources.** *There is a smarter way.*

**A PROVEN SOLUTION:** As a nationally recognized leader in the treatment and management of sex offenders, Liberty Healthcare allows you to uphold your commitment to community safety with highly effective programs designed for facility and community settings. And, Liberty can help you implement a well-established Sex Offender Management and Monitoring (SOMM) program customized to your specific needs and budget.

THE FREEDOM TO SUCCEED™

**Our programs are designed to make optimal use of your resources by delivering specialized treatment based on recidivism and risk level, avoiding unnecessary and excessive services to lower-risk offenders. Here's how:**

- Liberty provides an integrated continuum of sex offender specific services, beginning with recidivism risk assessment and treatment during incarceration - proceeding through a sex offender specific re-entry process.
- Liberty continues to manage risk and treatment in the community for those under supervised parole or conditional release.
- Liberty's programs conduct quality assurance activities and outcome research to determine effectiveness and risk reduction. This research feeds our evidence-based treatment model for continuous improvement.

**FACTS:**

**1** Research shows that the most effective (and cost-effective) treatment for sex offenders is to provide a continuum of services to offenders from prison to parole.

**2** In a study of seven categories of correctional programming for the Correctional Service of Canada (CSC), sex offender programs showed the best cost-benefit results.  
(source: CSC Website)

**3** Sex offender programs showed the highest rate of program completion (86%), the greatest reduction in recidivism rates for both readmissions (25%) and new offenses (22%), and yielded the largest net benefit per participant (US \$5,836).

**Partnering with Liberty Delivers Results by Reducing Risk**

Our collaborative and innovative approach to sex offender management and monitoring is nationally recognized for delivering distinct advantages. Partnering with Liberty for your SOMM program is proven to reduce recidivism, which in turn reduces the return of offenders to prison.

- Reduces sex offender recidivism
- Increases available prison bed space
- Reduces lifetime costs of incarceration
- Provides sex offender-specific re-entry programming and proper registration

**AS A RESULT, OUR STATE AND COUNTY PARTNERS HAVE SAVED MILLIONS OF TAXPAYER DOLLARS WHILE MAKING COMMUNITIES SAFER.**

**Liberty Healthcare:  
Trusted Expert. Valuable Partner.**

Liberty's leaders include many notable experts in the field of sex offender treatment and management. As part of our commitment to community safety, we have provided training and education in the area of sex offender treatment and management services to thousands of clinicians, parole agents, and law enforcement personnel. This training and education spans multiple agencies and states and every major conference in the field, including ATSA, NCCHC, ACA, NAPN, and more.

Through numerous programs, Liberty Healthcare has partnered with 31 states, the District of Columbia, and Bermuda, and has held nearly 200 discrete contracts with government and public sector entities, covering dozens of hospitals, facilities, and programs.
