

Correctional Mental Health

Reduced risk through timely access to high-quality mental health services

Liberty Healthcare provides a range of correctional mental health services to state and county agencies and sheriff's departments, including staffing and management of mental health services in secure and community settings. Our capabilities include comprehensive mental health services, acute psychiatric stabilization units, felony restoration of competency treatment programs, offender re-entry, and sex offense-specific treatment and management services. We have helped customers reduce risk through timely access to high-quality mental health services and achieve adherence with national standards for correctional healthcare.

14,000+

inmates / patients covered in 15 state and county correctional facilities

2,800+

Incompetent to Stand Trial (IST) inmates served

13%

recidivism rate for an offender work release and community re-entry program

THE LIBERTY ADVANTAGE

- Reduced risk and liability through timely access to high-quality mental health care in jails, prisons, and secure confinement facilities
- Effective jail-based alternative for restoration of competency that diverts state hospital admissions and reduces wait time for IST defendants
- Experience helping customers comply with national standards for correctional health care (e.g. NCCHC)

PROGRAMS AND SOLUTIONS

JAIL-BASED MENTAL HEALTH

- Comprehensive behavioral health services in correctional settings

RESTORATION OF COMPETENCY

- Timely treatment for detainees deemed incompetent to stand trial

ACUTE INPATIENT CARE

- Stabilization of inmates who are disabled by psychiatric illnesses

RE-ENTRY SERVICES

- Helping offenders with mental health, substance abuse, and behavioral challenges safely transition back to the community

SEX OFFENDER SPECIFIC TREATMENT

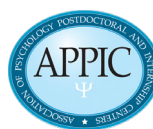

- Providing specialized risk assessments, treatments, and community monitoring for adults and juveniles who sexually abuse

Liberty is a highly valued partner, committed to delivering this innovative programming to our mentally ill inmates who require mental health treatment and medications ...

Since implementation, inmates can enter the [restoration of competency] program soon after being found incompetent and most often are restored and discharged from the program in the time that they would have remained on the waitlist for hospital admission.
