

# Intellectual and Developmental Disabilities

Comprehensive, person-centered services and supports for adults and children with intellectual and other developmental disabilities

For more than 30 years, Liberty Healthcare Corporation (Liberty) has provided programs that deliver diverse services and supports for adults and children with intellectual and other developmental disabilities (I/DD). Our experience includes managing residential programs, safely transitioning people from institutional settings to community-based living, delivering targeted community clinical supports that strengthen provider capacity, facilitating access to services through independent assessments, and managing quality oversight programs.

Liberty is certified by CMS as a Quality Improvement Organization (QIO)-like Entity and has years of experience providing statewide quality reviews of home and community-based services (HCBS). Through a field-informed approach to analytics, we help state Medicaid and human services agencies meet waiver requirements and make care management decisions that lead to improved health, personal, and financial outcomes.

## PROGRAMS AND SOLUTIONS

### Quality Management

- Statewide quality oversight and risk management of I/DD services

### Independent Assessments

- Functional assessments and eligibility determinations for Medicaid waiver services

### Enhanced Clinical Services

- Intensive treatment and wraparound services delivered to adults and children with I/DD

# 12,000+

initial and annual eligibility assessments for children and adults with I/DD per year

# 30+

new quality assessment tools developed for HCBS services

# 90,000+

annual critical incident reviews conducted in support of health and welfare

## THE LIBERTY ADVANTAGE

- Decades of experience transitioning people with I/DD and co-occurring disorders from facilities into the community
- History of developing quality assessment tools and risk management checklists to evaluate HCBS delivery
- Track record of helping states address issues raised by USDOJ and CMS under CRIPA, Olmstead, ADA, and other regulations
- Proven commitment to the principles of person-centeredness and national frameworks such as Charting the LifeCourse (CtLC), as well as those advanced by the Council on Quality and Leadership (CQL)

# “

“Liberty’s strong performance has not only allowed us to achieve our objectives but to exceed them. The program has become the keystone support for the state’s most challenging individuals with I/DD ...

Under Liberty’s operation, the program has successfully passed every survey conducted by the Department of Health. Liberty’s operation has been an unqualified success.”

THE FREEDOM TO SUCCEED™

## “Home and Community-Based Services (HCBS) Quality Initiatives

**Liberty has extensive experience designing, developing, and managing large statewide quality programs in support of meaningful outcomes for individuals with I/DD.**

**Person-Centered Practices:** Designing best in class quality programs, built around person-centered frameworks (e.g., Charting the LifeCourse, CQL).

**On-Site Provider Reviews:** Integrating quality with compliance in the review and support of quality service delivery.

**Critical Incident Management:** Performing reviews of over 90,000 annual critical incidents, reducing risk of recurrence.

**Mortality Reviews:** Recognized experts in the performance of meaningful mortality reviews, performing over 2,500 reviews over seven years.

## Independent Assessment Services

**Liberty offers high-quality, independent assessments and related services for individuals throughout the lifespan to determine programmatic eligibility and appropriate level of care based on individualized service needs.**

**Access to Services:** Performing over 80,000 annual assessments for HCBS and other long-term care supports and services.

**Investigations:** Over 45,000 annual reports of abuse, neglect, or exploitation assessed for risk and level of need.

**Supporting Tool Transitions:** Record of helping states transition to new instruments (e.g., SIS-A, interRAI).

**Advanced Analytics:** Converting data into meaningful information through robust technology and analytics.

## Enhanced Clinical Programs and Services

**Liberty’s enhanced clinical programs and services are designed to support full participation within the community for even those individuals with I/DD who have the most challenging needs (e.g., forensic involvement, serious mental illness).**

**Enhanced Clinical Support Teams:** Supplementing provider capacity through deployment of behavior analysts and mental health and medical practitioners.

**Intensive Residential Programs:** Providing short-term treatment and stabilization within residential settings.

**Intensive Individualized Transition Services:** Facilitating safe and effective transitions from congregate settings (e.g., ICF/IID, correctional facilities).
